

18th August, 2025

Kathmandu, Nepal

Dear Hiring Team,

I hope this message finds you well.

I am writing to express my interest in the Full Stack Developer position recently posted. With over a year of hands-on experience in full stack development—including Node.js, React, Next, Express, and SQL and NOSQL—I believe I align well with the technical and collaborative demands of the role.

Currently, I've worked at Hivecraft Tech as an Associate Software Engineer, where I've led key modules in the *Patriot Pulse* platform, including role-based access control, campaign analytics, and third-party integrations like puck editor, and many others for more than 1 years. My experience also includes internship projects in e-commerce, bidding systems, and student management, all built using scalable backend architectures and modern UI frameworks node and next js.

I have attached my CV for your consideration. I would greatly appreciate the opportunity to discuss how my skills and enthusiasm for clean, maintainable code can contribute to your team's success.

Thank you for your time and consideration.

Best regards,
Sulav Karki
